Convenience, Comfort and Control

Honeywell's FutureSmart home automation system provides the highest level of comfort and control, making your life easier than you've ever dreamed. Walk into a room and have the lights, temperature and music set to your tastes. Have the office phone ring when the doorbell rings at home. And by simply using a keypad, computer, PDA or any touchtone or cellular phone, you can control your lights, appliances, doors, heating and air conditioning, electronics—even water your lawn. It's next generation home control, and you'll wonder how you ever managed without it.

Honeywell's FutureSmart is the industry's leading solution for making any home—from apartments, condos and entry-level houses to custom residences—more enjoyable and convenient. You can choose packages that match your needs and budgets, and have access to the most advanced security, communications, entertainment and home control features at your fingertips. Since options vary according to individual builders, speak to your authorized professional about available packages.

Lighting

By communicating with special sensors, FutureSmart can intelligently manage lighting to suit your lifestyle or needs.

Your system can:

- Automatically turn lights off once you and your family have gone to bed
- Dim the lights in your home theater to set the right mood
- “Sense” your presence in a hallway or kitchen and light your way in the middle of the night
- Let you control indoor and outdoor lights from any remote location—even from the comfort of your car as you arrive home from work
- Schedule lights to come on at night or even rotate indoor lights for a “lived-in” look when you’re away from home

One-Touch Convenience

With the press of a single button, you can turn on the TV, start the DVD player, dim the lights and set the volume of the home theater to the perfect level.

Landscaping, Pools and Irrigation

FutureSmart can automatically water your lawn, fill up your pool and turn on the Jacuzzi.

Voice Control

By doing something as simple as speaking, you can control and schedule events and appliances in your home (i.e. “TV on”, “garage door open” etc.)

Temperature and Climate Control

FutureSmart can make life more comfortable—and affordable! You can come home from work to find your heating or AC set to the ideal temperature, making your home perfect for your arrival. HVAC thermostats can be programmed to provide time-of-day temperature changes as well as changes based on your system being armed or disarmed. You can choose to automatically control your thermostats from a central location or literally anywhere based upon your whereabouts. What's more, you'll save money by taking advantage of time-of-use utility rates and by conserving energy through the control of lights, thermostats and appliances.
