# Bring Your Home to Life.

As technology brings the world closer together, your home becomes the focus for working, learning and especially playing. FutureSmart can actually bring your home to life, letting you enjoy it to the fullest by providing an unrivaled entertainment experience. Equip your home for home theater surround sound, multi-room stereo and multi-room video. Everyone can watch their favorite satellite, cable or high definition TV in different rooms at the same time. Participate in multi-room gaming tournaments. The options are endless! Sit back, relax and enjoy.

Honeywell's FutureSmart is the industry's leading solution for making any home—from apartments, condos and entry-level houses to custom residences—more enjoyable and convenient. You can choose packages that match your needs and budgets, and have access to the most advanced security, communications, entertainment and home control features at your fingertips. Since options vary according to individual builders, speak to your authorized professional about available packages.

### Lights, Camera, Action

Entertainment in your home can be a high-quality, cinematic experience. Enjoy a movie experience that rivals that of the multiplex by transforming your living room into a home theater with the touch of a button. Close the drapes, dim the lights, start the DVD player, control the climate and pause the movie whenever you want.

### Multi-Room Viewing

For the ultimate in convenience, the television in any bedroom can show a movie from the DVD player in the family room, eliminating the need for additional players.

### Music to Your Ears

Enjoy the rich, full sounds of whole-house audio by listening to your favorite CD in any room of the house—not just where the stereo is installed. You can have music with the highest sound quality piped into entryways, kitchens, bedrooms, offices, living rooms or anywhere you desire.

Listen to the news in one room while your spouse listens to jazz in the den and your children blast the rock or hip hop tunes in their bedrooms. Everyone can enjoy what they want, when they want it. Convenient in-room controls allow you to effortlessly change selections, adjust the volume in each room or turn the music off completely with the touch of a button or remote control.

### Do or Do Not Disturb?

Combining home automation services with entertainment can add a whole new level of convenience to your life. In the middle of a movie when the phone rings? You'll see who's calling, and can "listen in" through a telephone, keypad or an external speaker when a caller leaves a message. You decide whether or not you want to answer the phone! Is an unexpected visitor appearing on your doorstep during a championship game? A picture can pop up on the corner of your TV screen to alert you to activities in and around your home, letting you choose what events warrant interruption.

### At your service...

Forgot to record your favorite show when you're not home? Just contact your system from any location and it can record the show and be cued to play minutes after you walk through the door.
